Becker SWCD and their partners offer technical and financial assistance to landowners for eligible BMPs and conservation projects. Call Today 218-846-7360 or visit our website at [www.BeckerSWCD.org](http://www.BeckerSWCD.org)

## Benefits of Native Plants

### Bank Stabilization

Native plants have dense, deep intertwined root systems that physically strengthen soil & stabilize banks from erosion. During wet periods plants remove excess moisture adding resistance to erosion or slumping.

### Clean Water

Deep rooted vegetation intercepts rain water runoff by slowing it down and filtering out much of the nutrients, soil particles and other pollutants.

### Fish and Wildlife Habitat

Diverse shoreland vegetation and woody debris both on shore and within the water provide shade, shelter, food and migration corridors for fish and wildlife.

### Protection Against Nuisance Geese

Fed up with geese? Geese are less inclined to wander through vegetated shoreline to get to a lawn for fear predators may be hiding in the tall vegetation.

### Help Our Pollinators

Pollinators need your help! There is increasing evidence that many pollinators are in decline. Native plants provide nectar for birds, bats & beneficial insects

### Low Maintenance

Once established, native plants are as maintenance free as can be - no mowing, fertilizer or chemicals

### Added Beauty

Native plants add beauty, habitat and biodiversity with an array of colors and textures throughout the seasons.

- Big Leaf Aster
- Zig Zag Goldenrod
- Jacob's Ladder
- Columbine
- Fringed Loosestrife
- Woodland Phlox
- Anise Hyssop
- Blue Wood Aster

## ~ TIPS TO REMEMBER WHEN PLANTING ~

Choose your appropriate plant growth habitat. Pollinators need blooming flowers from spring through fall. Site preparation is very important and the first step for success, instructions available in the Becker SWCD office. Root depth is important for soil stability and erosion prevention.

See pricing details below. Payment must accompany your order, additional plant material can be ordered upon request.

**We may make plant substitutions if necessary due to site characteristics, soil moisture, plant availability or other considerations.**

Due to circumstances beyond our control, Becker SWCD is not able to guarantee the survival of plant material we sell.
